Surface Finish and reverse side banding	The reverse side of sheets having only one decorative surface shall be suitable for adhesive bonding if so required	✓

 Do not use chemicals for cleaning.	 Extra care required in vertical pasting of laminates sheet as there is possibility of bubbles due to lack of uniform pressure.	 Avoid direct sunlight/ continuous light. These may cause color fading.	 Cracking at corners and around cuts may be caused by improper conditioning, improper bonding and poor planning. Avoid all these to prevent cracking at corners.
